### 3 Introduction

Australian Professional Galvanizing (APG) is a locally owned North Queensland based company. Originally Pollards Galvanizing established in 1966 with a modern plant now located in Townsville providing galvanizing services to clients from Gladstone to the Torres Straight islands and west to Mt Isa. The modern state of the art plant, offering comparable capabilities found anywhere in Australia. The company operates depots in Cairns and Mackay serviced by our own transport fleet. We have 80 plus employees offering technically experienced staff with over 100 years combined knowledge to assist with design and any special requirements.

### 4 Our Values

APG use this set of core values to establish a code of conduct required by all employees.

- We always conduct ourselves with ***courtesy, manners, and respect***
- We value team play. Production is the whole process not just one section.
- We face our day with the discipline to get the job done right the first time.

### 5 Vision Statement

***“TO BE THE FIRST CHOICE FOR HIGH-VOLUME MANUFACTURING & GALVANIZING SERVICES”***

Our vision statement inspires us to be the first choice for customers, suppliers, and employees. This statement guides decision making and is reinforced by our strategies and actions.

### 6 Capabilities

#### **Galvanizing Facility - Townsville**

- *Large modern Galvanizing Plant located in Townsville, North Queensland*
- *Zinc Galvanizing Kettle dimensions are 12.5m X 1.6m X 2.8m (L\*W\*D).*
- *The plant has the capacity to process 2000 tonne plus per month*
- *22.0m long chemical processing tanks*
- *Maximum double dip length 20 metres plus*
- *Maximum roll over double dip frame 5.2 metres wide and up to 12 metres long.*
- *Maximum lifting capacity 20 tonnes. (Operate 6 x 10T Overhead Gantry Cranes)*
- *Fleet of Forklifts (Max 7.0T Forklift capacity)*

Product being Galvanized

### **Transport and Logistic - Townsville, Cairns & Mackay**

- *Support offices & yard hardstand storage areas located in Cairns & Mackay*
- *Fleet of trucks to transport material to and from our Townsville galvanizing plant*
  - ✓ *3 x Primemover*
  - ✓ *Fleet of varied semi-trailers (Standard flat deck, Drop deck, expandable, B Doubles)*
  - ✓ *Isuzu FVR165/300 truck - 8.0M Flat Deck Tray - Tare 7500Kg*
  - ✓ *Commercial vehicle fleet*

Light Vehicle Fleet

DAF XF105 Primemover with extendable load

## **7 Our Operational Approach**

Australian Professional Galvanizing (APG) can provide a full galvanizing service from collecting your steelwork, chemical cleaning, galvanizing and return transport. We also operate depot in Cairns and Mackay which allows us to deliver steel back to your local depot. APG will handle all inter-depot transport, moving your product to Townsville for galvanizing and returning to your regional depot. You may need your product to go elsewhere, different regional depot or even direct to site. We can help with that.

With our regional footprint and people on the ground, we can offer professional advice on design, fabrication, material chemistry and best Galvanizing practises.

Remember *"Fit for Galvanizing"* gives the best quality finish every time.

## **8 Quality, Accreditation and Certification**

Inbuilt quality starts with the design for steel fabrication, galvanizing and continues right through all subsequent phases. It involves the quality that comes from the skill and care of the person or persons operating the process, which conforms to Australian Standard ISO 9001:2015 including (AS/NZS ISO 9001:2016) Quality Systems. This standard is aimed primarily at preventing and detecting any nonconformity during production and implementing the means to prevent its recurrence so to provide a service in accordance with client's specifications and statutory requirements.

APG have implemented a Quality Assurance System in accordance with the Australian Standard ISO 9001:2015 (AS/NZS ISO 9001:2016) APG is committed to supplying a galvanizing service, to Australian Standard AS/NZS 4680:2006 and to meet specific customer requirements from tender stage, receiving goods, processing, testing, and delivery of product. The life expectancy for the galvanized protective coating is dependent on the atmospheric conditions as outlined in AS/NZS2312 Atmospheric Corrosive Environment, and AS/NZS4312 Atmospheric Corrosive Zones.

APG is certificated to ISO requirements with external audits annually.

**SAFETY** ISO 45001:2018 (AS/NZS ISO 45001:2018)

**QUALITY** ISO 9001:2015 (AS/NZS ISO 9001:2016)

**ENVIRONMENT** ISO 14001:2015 (AS/NZS ISO 14001:2016)

ISO 45001  
SAFETY

ISO 9001  
QUALITY

ISO 14001  
ENVIRONMENT

The Quality Manual and associated procedures define systems that will ensure quality service conformance to customers' expectations and needs. Where the customer's requirements are not specific, all works to be done in line with Australian Standard AS/NZS 4680:2006.

- QA system ensuring we comply with your QA requirement and AS/NZS 4680:2006
- Full in-house tracking and traceability through the galvanizing & transport process.
- Member of the Galvanising Association of Australia
